Team Project Guidelines

For this project, each team will design and develop a basic online screen-printed T-shirt shop with the following requirements:

1. **Available Product(s) - T-shirts**

    a. Nine (9) different designs on standard single color T-shirts.
    b. Each design available in a variety of four (4) colors (team choice).
        i. Each color should be viewable with the design.
    c. Each design must be available in adult sizes (S-2XL) at the least.
    d. Each design/color/size should have finite inventory in the database.
    e. The customer should be able to set the quantity for each item selected.

2. **Website Organization**

    a. All pages to include the following:
        i. Header with company name/logo, website navigation, customer login
        ii. Footer with sitemap, company info and contact information

    b. Website must contain the following pages:
        i. Home/Catalog page
            1. Available items with links to specific item page
            2. Additional info/details such as sale information or alerts

        ii. Item page
            1. Showcase design
            2. Select color, size, quantity
            3. Each color should be viewable with the design
            4. “Add to cart” functionality
            5. Additional item info/details

        iii. Shopping Cart
            1. List of selected items with color and size
                a. Ability to remove items from cart
            2. Quantity calculations
            3. Grand total (items, applicable taxes, shipping)
                a. Sales tax: 8.5%

b. Shipping: Flat rate based on item totals

iv. Customer Profile page
1. Contact information
a. Billing Address
b. Shipping Address
c. Email Address
d. Mock Payment Information
2. Order History display
3. Password Reset functionality

v. About Us/Contact Us page
1. Company History
2. Company Bios
3. Contact Us Form

Teams

1. Teams will be composed of a number of students at the discretion of the instructor.
2. Each team will produce the deliverables necessary for the project.
3. Each team will provide 2x2 Progress Status Reports when submitting deliverables.
4. Each team member is free to submit Peer Reviews to the instructor at any time during the project.This is meant to mitigate conflict and foster professionalism within the teams.

Deliverables Schedule

Deliverable Number	Week	Deliverables (Including 2x2 Progress Status Report)	Due 11:59PM
1	8	Website Planning/Brainstorming & Needs Assessment	in-class
SPRING BREAK			
2	9	DB Design, ERDs and Database Setup	3/23
3	10	Website Framework, Navigation, Sitemap	3/30
4	11	Catalog and Item Views	4/6
5	12	Shopping Cart Functionality	4/13
6	13	About Us/Contact Us Functionality	4/20
7	14	Final Project Report and Evaluations	4/27
8	15/F	In-class Team Presentations	TBD

Grading

As in industry, focus on making sure the work done and submitted is of HIGH QUALITY as it is a direct reflection on you, the RIT student, signing their name to it. Grading will include focus on structure, presentation, grammar, comprehensiveness of analysis and mastery/demonstration of topic and course material.

1. **Website Server and MySQL Database Setup**
    a. Each student will set up their own web server space and MySQL database (access will be provided by the instructor).
    b. Each student will be expected to maintain an up-to-date copy of their team's project website on their *people.rit.edu* web server.

2. **Website Plan**
    a. Each team will develop a website plan including sitemap.
    b. The plan should detail every aspect of the website and associated DB usage.

3. **Database Design and ERDs**
    a. Each team will develop and maintain a diagram that shows the relationship of entities stored in the database (ERD).
    b. Each team will develop a database using the diagram.

4. **Account Registration, Login, Profile Page**
    a. Each team will create a means to allow a customer to create an account.
    b. Each team will create a means for the customer to log in to their account and alter certain aspects of it.
    c. Each team will create a means for the customer to log out of their account.

5. **Catalog, Ordering, Cart**
    a. Each team will create a catalog page with links to listings for each product.
    b. Each team will develop a means for the customer to select items for adding to their shopping cart.
    c. Each team will create a shopping cart where the customer can make quantity changes (including removing an item), see current items, totals, associated taxes and shipping costs.
    d. Each team will create a means to maintain the proper inventory quantities in the database.
    e. Each team will create a means to notify the customer via email when the order is submitted for checkout, and will include final costs, much like a receipt.

6. **Final Deliverable**
    a. Each team will deliver a comprehensive project report that articulates the vision and scope of the project, including a project overview, a statement of the problem/opportunity addressed, and a description of the proposed solution, including technical design features, ERDs, diagrams, etc. Each team will provide a link to the website used for the presentation.

7. **Final Presentation**
    a. Each team will create a final demonstration from start to finish, on how their system works.
    b. This should be in a format inclusive of the system and UI design with additional annotations and information provided to illustrate overall performance.
    c. This will be a concise LIVE demonstration. Slide (PowerPoint) presentation may be used for the additional information

8. **Individual Report**
    a. Each student will be required to complete an individual report outlining their contributions to the overall project.
    b. These reports will be used in the calculation of each student's final grade.

9. **Group Evaluation**
    a. Each student will be required to complete an evaluation of their team members' performance.
    b. These reports will be used in the calculation of each student's final grade.
    c. The average of the evaluation scores from their team members will be used as a grade modifier for each of the group deliverables.

Instructor's Note
The instructor reserves the right to alter these guidelines or make corrections, if deemed necessary, due to unforeseen events or circumstances, and will facilitate such changes in a timely manner with appropriate notification.
